

Kentucky Office of Homeland Security

2009 Annual Report

Steven L. Beshear Governor

Thomas L. Preston Executive Director

KENTUCKY OFFICE OF HOMELAND SECURITYIntroductory Letter To The FY 2009 Annual Report

To: Honorable Steven L. Beshear

Governor of the Commonwealth of Kentucky

From: Thomas L. Preston, Executive Director

Date: October 30, 2009

This Annual Report covering Fiscal Year 2009 catalogs multiple activities engaged in by The Kentucky Office of Homeland Security.

Prevention, mitigation, knowledge and preparedness are key words within our focus. These words have a special strategic meaning based on adequate supply of resources, counterterrorism experience, expert training of first responders and citizen outreach into all of Kentucky's counties.

The "impossible" is our mission. <u>Every terrorist attack can not be foiled.</u> Conversely, an aggressor bent on killing, maiming, destroying and civil interruption can fail 99 out of 100 times and be successful! So it's that one act we try to at least lessen or disrupt partially.

History has never witnessed an era sans crime. Natural disasters also always have occurred. But the greater the prevention and mitigation, the less cost in lives, disruptions, dollars and long-term setbacks for the Commonwealth of Kentucky.

Today we're trying to meet that enormous challenge with a permanent workforce of just 21 men and women plus collaboration through part-time training teams.

Several matters must be made clear.

- KOHS does not have access to or authority over all federal Homeland Security grants coming to the Commonwealth. Frequently, either by Congressional earmark or from the U.S. Department of Homeland Security, certain awards either "pass through" KOHS or are sent directly to the recipient organization.
- Steady federal financial declines impacting KOHS since 2005, especially considering our growing workload, result in decreased assistance in thwarting dire events throughout Kentucky. This adversely affects all counties, communities, projects and investments. It also has evolved into a high risk conundrum on a KOHS team now 25% below absolute need.
- General fund dollars (only \$250,000 to begin with) now amount to approximately half of the original sum because of mandated reductions, mandated payments to various state agencies and ordered cut-backs caused by deficits.
- Notwithstanding the severe monetary crisis and other obstacles, the
 past year saw remarkable achievements, successful missions and a
 zest for professional service on behalf of all Kentuckians.
 Nevertheless, let there be no mistake in the fact that a point of
 diminishing returns is alarmingly visible to any competent,
 responsible observer.

Noteworthy accomplishments beyond the normal myriad of daily pursuits

- We set the stage for a more vigilant, aware and responsive citizenry through the Eyes & Ears on KY initiative. Instant positive results ensued.
- We expanded the KOHS services and accomplishments at the Kentucky Intelligence Fusion Center. Our assistance to law enforcement agencies both in-state and throughout many parts of the nation paid major dividends in combating criminal activities.
- We acquired a Senior DHS Intelligence Specialist whose personnel costs are covered by that federal agency. He is assigned here permanently.

- We instigated a new academic professional development program for capabilities and skills of all KOHS Intelligence Fusion Center staff members. Increasing skills and capabilities is an absolute necessity in today's world of terrorist and other criminal source threats.
- By order of the Governor, and after unsuccessful efforts by others, we were given management responsibilities in drowning victim search efforts at Kentucky Lake. This resulted in recovery of the unfortunate individuals.
- Through special funding we aided and assisted in the establishment of safety and security measures at the Capitol City Airport benefitting the state air fleet, National Guard properties and general aviation.
- We gained -- again without state government finances -construction of a highly secure room contiguous to the *Intelligence Fusion Center*, designed to accommodate and protect highly secure,
 sensitive technology for daily use by KOHS, KSP and DHS
 specialists. Federal law enforcement agencies also can have access.
- We have noted a marked increase from the private sector for guidance, training and addressing audiences about security issues based on national and international circumstances and conditions.
- Only Kentucky's Homeland Security Executive Director was invited to participate in the famed intensive week-long *U.S. Army War College's National Security Seminar*. This involved America's senior officers destined for future elite assignments at the highest military levels, along with high ranking personnel from 42 foreign countries as well as civilians from diverse federal and private sectors.
- We were successful in creating the closest-ever working relationship with the office of the Secretary of Homeland Security.
 Circumstances fostered one-on-one contact and direct participation with the Secretary during visits to various parts of Kentucky.
- After almost a year's absence, and through cooperation from the Secretary, we acquired a Kentucky-based DHS Protective Security Advisor, again without requiring state funds other than for administrative support.

• Through compelling issues, near non-stop strategic maneuvers and with collaborative efforts, we made the greatest degree of progress in moving toward a much higher level of security for critical infrastructure rating our highest degree of concern. Much work and expense remain but the barriers were opened.

Finally, I am especially proud of the fact we received outstanding reports from both state and federal audits, signifying our attention to fiscal responsibility. This, of course, is what all agencies are supposed to do, and our focus on fiscal management never wanes. Such reports further reflect the competence and commitment of our team.

<u>Training Coordination and National Incident Management System (NIMS) Programs</u>

The National Incident Management System (NIMS) is an ongoing federal program enabling responders and support organizations at all levels to work more effectively while managing emergency incidents. The following NIMS Incident Management Courses were delivered as a result of a partnership between KOHS, The KY Fire Commission, The Department for Public Health, The KY Board of Emergency Medical Services, The KY Division of Emergency Management and the Center for Domestic Preparedness.

- ICS 300 29 classes
- ICS 400 11 classes

Total attendance at the above listed courses – 869 responders (middle management and above was required).

The Kentucky Office of Homeland Security is responsible for coordinating training within the Commonwealth and Out-of-State Training available to first responders. During the reporting period, 224 Kentucky responders attended training courses outside the Commonwealth of Kentucky.

KOHS and KY's Protective Security Advisor (a Department of Homeland Security employee) has partnered to address training needs for Kentucky's Critical Infrastructure by providing training opportunities (at no cost) to both Public and Private Sector entities.

There were twenty one (21) "All Hazards" Training Courses coordinated by the Kentucky Office of Homeland Security, and conducted within Kentucky. The course topics included the following:

- Public Information Courses
- Radiological / Nuclear Response
- Biological Agent Response
- Training for Senior Officials
- Event Planning for Public Safety
- Agriculture Terrorism Awareness
- Crime Scene Management
- CAMEO
- Rail Car Incidents
- Business Continuity and Emergency Management
- Threat and Risk Assessment
- Disaster Management for Water and Wastewater Utilities
- WMD Tactical Operations Course

KOHS also provided support to enhanced training efforts at the following in-state Conferences:

- Homeland Security/KY State Fire School
- Green River Fire Officers School
- Disaster Preparedness for Kentucky's At-Risk Population
- The KY Firefighters Association Conference
- Kentucky Emergency Services Conference
- The Hazard Fire School
- The KY Community and Technical College System Safety Conference
- The Dixie Fire School
- KY Safe Schools Conference

The Kentucky Office of Homeland Security worked with partner agencies to develop a World Equestrian Games (WEG) Training Committee (an Ad Hoc Committee) to address the training needs for public safety participants in preparation for the 2010 World Equestrian Games.

- Training needs were identified based on the Target Capabilities List (TCL).
- The Center for Domestic Preparedness will provide training to over 600 law enforcement officers from state and local in crowd control and civil disorder (at no cost to state or local government).
- Through the work of the Committee, plans have been developed to train multi-agency teams in protester device response.
- Plans for training for state and local officials are being developed and will be conducted in the form of a workshop or tabletop exercise.
- The KOHS Training Coordination Branch continues to coordinate the delivery of several classes within Kentucky to address biological response.

The National Infrastructure Protection Plan (NIPP)

Implementation goal: Build a safer, more secure and more resilient America by enhancing protection of the nation's critical infrastructure/key resources.

Objectives: Prevent, deter, neutralize or mitigate harmful effects of deliberate efforts by terrorists to destroy, incapacitate or exploit critical infrastructure, and to strengthen national preparedness, timely response and rapid recovery in the event of an attack, natural disaster, or other emergency.

The primary means by which the Kentucky Office of Homeland Security is working to implement the NIPP is by administering two programs by and through our Kentucky Critical Infrastructure Protective Program and the Kentucky Intelligence Fusion Center: The Buffer Zone Protection Program and the Automated Critical Asset Management System.

Buffer Zone Protection Program (BZPP)

The Buffer Zone Protection Program is a dedicated source of funding received from the U.S. Department of Homeland Security (DHS) to assess and strengthen vulnerabilities of critical infrastructure sites deemed by the DHS as a priority within the Commonwealth.

The BZPP provides responsible jurisdictions with funding for planning and equipment purchases for prevention, mitigation or response to an incident at or around these sites.

The BZPP received \$400,000 in direct response form the U.S. Department of Homeland Security in FY09 for two sites within a specific CI/'KR sector deemed critical to Kentucky by DHS.

Automated Critical Asset Management System (ACAMS)

The Automated Critical Asset Management System (ACAMS) is a secure webbased information management tool provided to Kentucky by the U.S. Department for Homeland Security.

ACAMS enhances data storage and information sharing of Kentucky's critical infrastructure information within a federally secured database. This provides a framework for the development of the NIPP by allowing the first responders of the Commonwealth to identify critical assets, assess risks to those assets, prioritize assets, and implement protective measures – all key pieces of the risk management framework of the NIPP.

The Kentucky Office of Homeland Security began using ACAMS in the spring of 2007 and has since trained multiple agencies statewide on the functionality of ACAMS for their agency and the Commonwealth as a whole.

As of October 2009, ACAMS implementation included:

- Training of 84 personnel from the Kentucky Office of Homeland Security, Kentucky State Police, Kentucky Fish and Wildlife, Kentucky Army National Guard, Louisville Metro Police, Louisville Metro Fire, Lexington Police Department and the University of Kentucky Police Department. Training enables the graduates to be regional CI/KR specialists in carrying out assessments and relationship building between the public and private sector as a means of supporting information gathering and sharing with the Kentucky Intelligence Fusion Center.
- The entry of more than 2,400 critical infrastructure assets in the KY ACAMS inventory.
- Completion of 90 vulnerability assessments on critical assets with support from the Kentucky Intelligence Fusion Center in analysis and generation of analytical products. Additionally, information is gathered on an asset's threat history and options for consideration for protective measures for both the asset and local response agencies are considered to use for prevention/response purposes.

External Affairs

Citizen Awareness

KOHS outreach initiatives have centered on distributing preparedness information and safety advice to local community leaders and the general public.

Through conferences, festivals and other community events these duties on behalf of a more secure Kentucky were spearheaded by KOHS, using its own limited representation or an outreach contract with Area Development Districts.

Some examples:

- Sponsored numerous conferences ranging from Safe Schools to Fire Schools.
- Displayed preparedness information at more than three dozen conferences and community events around Kentucky.
- Continued marketing the *Eyes and Ears on Kentucky* suspicious activity reporting tip-line, to law enforcement agencies, transportation training centers, and to the general public.
- Throughout the year, KOHS Executive Director along with key staff
 members conducted numerous public appearances and communications
 ventures. <u>Purposes:</u> Community safety/security/vigilance/awareness
 among the citizenry; explanations to local officials about KOHS programs;
 open source question and answer programs; distribution of relevant
 materials; participation by invitation in neighborhood outreach enterprises.

Chief Information Officer Activities

Statewide Communications Interoperability Plan (SCIP)

The Commonwealth submitted its required annual update to the Statewide Communications Interoperability Plan (SCIP) following a SCIP annual review with members of the Kentucky Wireless Interoperability Executive Committee (KWIEC.) The Commonwealth also held a SCIP Implementation Planning workshop facilitated by the U.S. Department of Homeland Security's Office of Emergency Communications (OEC.) The SCIP continues to act as a *current* directive on near and long term communications initiatives supporting public safety practitioners.

Statewide Wireless Voice Interoperability - Voice Mutual Aid

Kentucky's Voice Mutual Aid system gives first responders an ability to communicate during a range of incidents.

Mutual Aid is the capability for agencies to tune in to a dedicated frequency using a standard protocol establishing interoperable voice communications with other first responders on site.

This system is available at no cost to first responders and is 100% compatible across the Commonwealth.

- 775 agencies have signed agreements to use the system an increase of 65 since publication of the 2008 Annual Report.
- Began implementing projects totaling \$15,625,000 from the Public Safety Interoperable Communications (PSIC) federal grant program to improve the state's Voice Mutual Aid system and implement multiple Mobile Communication Centers.
- KOHS awarded in excess of \$3,000,000 in 2009 Homeland Security Funding for the purchase of radios.

Statewide Data Interoperability - Mobile Data Network

Wireless data communication is an essential tool for effective response and successful law enforcement activity. It permits 800 MHz wireless data communication across the Commonwealth. Via this network, law enforcement and other response officials can access the Kentucky Open Portal Solution and Law Enforcement Information Network of Kentucky to run license plates and personal information on individuals.

Users can submit various reports from their vehicles such as citations, incident and electronic intelligence reports.

Kentucky still remains the only state in the nation to own a statewide mobile data network and mandate that all local first response agencies be granted access to the system at no charge.

- Over 3,000 first responders are on the network.
- Twenty tower sites upgraded to digital microwave.
- Added three additional tower sites to expand coverage.
- KOHS awarded approximately \$1,850,000 in 2009 Homeland Security Funding for the purchase of Mobile Data Computers to access the Mobile Data Network.

CBRNE Detection Capability

South East Transportation Corridor Pilot (SETCP)

In FY 2006, the Domestic Nuclear Detection Office (DNDO) began a multi-year pilot program to test certain elements of the interior layer of a Global Nuclear Detection System.

SETCP involved federal, state, and local participants across the South East of the United States with a focus on the detection and interdiction of illegal nuclear and radiological materials on the nation's interstate highways. SETCP encompassed nine states: Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Kentucky and the District of Columbia.

This pilot project culminated with a multi-state full-scale exercise conducted by the DNDO in November 2008. Remaining SETCP funds will be used to procure one additional Radiation Isotope Identification Device (RIDD) and approximately seventy radiation pagers for public safety personnel.

In addition to Kentucky's participation in the SETCP, KOHS supplemented the Chemical, Biological, Radiological, Nuclear and Explosive Weapons (CBRNE) response by awarding \$1,575,000 for Improvised Explosive Device (IED) equipment and training. Equipment procured with KOHS grant funds included:

- Bomb suits
- Containment vessel
- Explosive substance detection and identification device

KOHS grant funds also provided statewide certified bomb technician training in Advanced IED Electronics, Advanced Explosive Ordnance Disposal (EOD) Counter Measures, and EOD/SWAT Interoperability

South East Regional Research Initiative -- Multi State Sharing Initiative

The South East Regional Research Initiative (SERRI)- Multi State Sharing Initiative (MSSI) is a partnership between Oak Ridge National Lab (ORNL) and the Southern Shield states (Kentucky, Mississippi, Alabama, Florida, Tennessee, and South Carolina). The goal of the MSSI project is to develop an automated method to share Suspicious Activity Report (SAR) data among the Southern Shield Fusion Centers. Kentucky has implemented the information sharing environment and is preparing to enter into testing real time information exchange among participating states.

Kentucky Intelligence Fusion Center

The Kentucky Intelligence Fusion Center was created for accommodation of several state and federal directives as well as to facilitate statewide security to include situational awareness and information sharing, communication and transportation incident management.

Essentially, the Fusion Center is designed and staffed for diverse yet associated purposes. One is to increase and improve gathering of law enforcement intelligence (including suspicious activity reporting) for research analysis and dissemination to appropriate local, state and federal agencies. Building a stronger network for professional collaboration in an era of global terrorism continues to be one of the motivating factors. Timely and accurate acquisition, analysis and transmission of results are necessary components in helping solve crimes, predicting and preventing future actions and protecting the Commonwealth.

Concurrently, the Fusion Center is crucial to the Kentucky Transportation Cabinet's monitoring of vehicular traffic and road conditions. As an invaluable all-crimes resource, it also includes situational awareness and communications capabilities through the Kentucky Transportation Cabinet's Division of Incident Management and the Kentucky State Police Headquarters Communications Branch.

Each task is at the heart of this heavily used facility.

In addition to the periodic presence of other government organizations tasked with public protection, the Center had *regular representation* from the following agencies throughout the past year:

- Kentucky Office of Homeland Security
- Kentucky Transportation Cabinet
- Kentucky State Police
- Kentucky Department of Corrections
- U.S. Department of Homeland Security
- Federal Bureau of Investigation
- U.S. Secret Service
- Lexington Police Department

The Center also produces and distributes intelligence/information bulletins to law enforcement agencies across the Commonwealth through the Intelligence Liaison Officer Program.

Approximately 220 agencies have Intelligence Liaison Officers. In addition to the distribution of these bulletins, a number of other services are provided to support law enforcement across the Commonwealth:

- Fugitive Location/Apprehension.
- Suspect Identification.
- Investigative Support.
- Receives Field Information Reports from Law Enforcement Officers.
- Threat Assessments for Special Events.

In furtherance of information sharing and situational awareness, the Fusion Center also has the following capabilities:

- Monitor CSX National Operations Workstation (NOW) System.
- AMBER Alert Activation Point and section for Missing and Exploited Children.
- State-wide Communications.
- 24/7 answering point for 866 EYE-ON-KY Tip-line.
- 24/7 point of contact for the National Operations Center (NOC).
- 24/7 answering point for state-wide DUI and Arson hotlines.

In addition to the aforementioned activities, personnel have been responsible for the following:

- Attendance of regional law enforcement intelligence meetings.
- Participation in Area Maritime Security Committee meetings.
- Presentations at a variety of meetings focused on public protection, awareness and preparedness.

There are two notable developments in the evolution of the Kentucky Intelligence Fusion Center:

- The Fusion Center is now staffed by a Senior Intelligence Officer assigned by the U.S. Department of Homeland Security. This Officer is responsible for assisting the Fusion Center in achieving the baseline capabilities for Fusion Centers as well as serving as a liaison to federal agencies within the intelligence community and other DHS component agencies.
- Work has begun on a "secure workspace" for the Kentucky Intelligence Fusion Center. This workspace will allow both federal and state intelligence analysts to have access to classified information systems which are essential in gathering pertinent information regarding threats to our Commonwealth and our Nation.

JusticeXChange

JusticeXChange is a real-time "who's in jail" database feeding offender information directly from local jail management systems into a central database for spontaneous access to all booking and release information. KOHS provides overall state level system administration for JusticeXChange.

This is a fully operational asset with nearly 2,000 users across the Commonwealth. The user base consists of law enforcement, corrections, child support, military, and prosecutorial personnel. During this reporting period, Kentucky users located over 1,800 non-custodial parents and hundreds of wanted individuals or persons of interest.

Successes using JusticeXChange include:

- Enabled law enforcement to corroborate information given by an informant on an individual's past criminal activity and whereabouts in a counterfeit investigation.
- Located an individual with an outstanding warrant from 2003 who was currently incarcerated. The detention facility was notified and the warrant was served.

e-Warrants

The Kentucky e-Warrants system provides an automated method for the creation, dissemination, and clearing of warrants. This innovative procedure is web-based, thus providing users the ability to create criminal complaints, sign complaints into warrants, summonses or send to mediation, and access those documents via the internet. e-Warrants interfaces with the Law Enforcement Information Network of Kentucky, permitting 100% of all warrants entered into the system to be available to law enforcement 24/7.

- e-Warrants is operational in six counties- Jefferson, Fayette, Campbell, Bourbon, Scott and Woodford.
- 55,773 new warrants and summonses have been issued in the new system.
- 35,513 warrants have been served and 27,894 arrests have been made.
- Overall service rate for warrants of arrest is 80.4 percent.
- Kentucky received a \$3.9 million grant from the American Resource and Recovery Act to expand the e-Warrant system to more than 100 rural counties.

Kentucky Office of Homeland Security Exercise and Evaluation Program Detailed Activities Report Oct 1, 2008 – Sep 30, 2009

Main KyHSEEP Exercises and Support Functions:

October 21, 2008	Area 2 FSE - Hopkinsville	Butch
November 3, 2008	DNDO SETCP FSE - London	Sabine
February 24, 2009	JCTC TTX – Louisville	Butch
February 25, 2009	Gateway TTX – Edgewood	Sabine
April 3, 2009	Gateway II TTX – Edgewood	Sabine
April 28 – 29, 2009	Intra-State Mutual Aid TTX – Lexington	Lisa
May 14, 2009	Coast Guard TTX – Murray	Butch
May 20, 2009	Unbridled Response II FSE – Louisville	Sabine
June 12 – 14, 2009	HSEEP Mobile Course – Lexington	Sabine
June 18 – 19, 2009	National Veterinary Stockpile FSE – Frankfort	Sabine
July 21-22, 2009	KCTCS Safety Conference – Elizabethtown	Lisa
July 28-31, 2009	Governor's Workshop	Butch
August 1 – 9, 2009	Pandemic Flu & Terrorism Exercise	All
August 25 – 27, 2009	COM-L Classes and Exercise	Butch
September 8 – 10, 2009	KEMA – KENA – APCO Conference Support	Butch

HSEEP Training Courses and State Planning Meetings:

October 29, 2008	KyHSEEP Meeting – Versailles
November 4, 2008	KyHSEEP Meeting – Versailles
January 21, 2009	KyHSEEP Meeting – Versailles
March 23, 2009	KyHSEEP Meeting – Versailles
May 27, 2009	KyHSEEP Meeting – Versailles

June 12 -14, 2009 Teach Federal HSEEP Mobile Course – Lexington

Preparation and planning for:

October 6, 2009 KyHSEEP Meeting – Versailles, to be held October 2009.

Direct Exercise Planning and Support Functions:

KCTCS - Safety Conference - Lisa

March 11, 2009	Planning Meeting
April 16, 2009	Planning Meeting
June 10, 2009	Planning Meeting

Area 2 FSE - Butch

October 20, 2008	C/E Training
March 30, 2009	AAR/IP

August 22, 2008 Other Planning / Site visits

<u>Domestic Nuclear Detection Office – Southeast Transportation Corridor</u> <u>Pilot - Sabine</u>

October 1, 2008	State EOC Player Meeting – Frankfort
October 7, 2008	Fusion Center Player Meeting – Frankfort
October 15, 2008	KVE Player Meeting – Frankfort
October 30, 2008	Player Briefing – London
October 31, 2008	C/E Briefing – Frankfort
November 3, 2008	FSE Direction & Control, Logistical Support – London

Intra-State Mutual Aid Workshop & Exercise - Lisa

January 14, 2009	Planning Meeting – Lexington
March 11, 2009	Planning Meeting and Demonstration – Lexington
April 10, 2009	Planning Meeting – Lexington

Coast Guard TTX - Butch

January 22, 2009	IPC
March 4, 2009	MPC
May 4, 2009	MSEL Conference
April 16, 2009	FPC
May 13, 2009	C/E Training
May 20, 2009	AAR/IP

January 6, 2009 Other Planning / Site visits

<u>Unbridled Response II - Sabine</u>

November 21, 2008	Planning Meeting – Versailles
December 10, 2008	DPH Preparedness Meeting – Versailles
January 12, 2009	RSS Site Visit – Louisville
January 23, 2009	UR-II Louisville Planning Meeting – Louisville
January 29, 2009	UR-II Statewide MPC – Versailles
March 3 – 4, 2009	UR-II Statewide MSEL Conference – Versailles
April 8, 2009	UR-II Statewide Meeting – Versailles
May 19, 2009	UR-II Louisville C/E Briefing – Louisville
May 20, 2009	UR-II Louisville Evaluation Support – Louisville

<u>National Veterinary Stockpile & Multi-State Partnership</u> <u>Foot-and-Mouth Disease Logistics Exercise – Sabine</u>

February 24 – 25, 2009	NVS MPC/MSEL Conference – Louisville
March 19, 2009	MSEL Conference – Teleconference
April 20 – 23, 2009	FPC - Chicago, IL
June 1, 2009	Planning Teleconference
June 2 – 3, 2009	Warehouse Team Training – Frankfort
June 9, 2009	C/E Conference – Frankfort
June 16 – 17, 2009	TTX - Wheaton, IL
June 19, 2009	FSE, Logistical Support – Frankfort
June 24, 2009	C/E Controller Debrief

CUSEC Multi-State Planning - Butch

October 1, 2008	Interoperability Workshop – Benton
November 7, 2008	Resource Management Workshop – Lake Barkley
November 11 – 13, 2008	Exercise Officer Meeting – Tunica, MS
November 15 – 19, 2008	IAEM Conference – Kansas City, KS
December 11 – 12, 2008	CUSEC Workshop – Lake Barkley
April 23 – 24, 2009	National Level 2011 C/O Meeting – Memphis, TN
September 21-22, 2009	CUSEC Exercise Officers Working Grp. – Little Rock AR

KCTCS - Preparedness Exercises - All

January 15, 2009 G	Satewood C	Campus P	lanning l	Meeting –	Edgewood

February 10, 2009 JCTC Planning Meeting – Louisville February 11, 2009 Gateway Meeting – Edgewood

September 1, 2009 JCTC Downtown Planning Meeting – Louisville

Pandemic Flu & Terrorism Exercise - Sabine

October 7 – 8, 2008 KyEM Pandemic Flu Workshop – Frankfort January 14, 2009 Pandemic Influenza Workshop – Frankfort

March 18, 2009 Planning Meeting – Frankfort May 5, 2009 Planning Meeting – Frankfort

August 5-6, 2009 Midway Terrorism Exercise – Midway

Other Support for Various Functions:

October 14, 2009 U of L Fire Dept. FSE Planning Support--Louisville

October 15 – 16, 2008 EMS/CUSEC Workshop – Bowling Green

October 24, 2008 E-Warrants Class – Versailles

November 5, 2008 Trans Montaine FSE – Paducah (Evaluation Support)

November 7, 2008 E-Warrants Class – Versailles
Jan 27 – Feb 13, 2009 Ice Storm Support – Western KY
Feb 27- March 1, 2009 Green River Fire School – Lexington

March 17, 2009 Health Services Ice Storm AAR/IP Facilitation –

Western KY

April 1, 2009 Kentucky Earthquake Technical Group – Western KY May 7, 2009 Governor's Safety and Health Conference- Louisville

June 10 – 14, 2009 State Fire School – Lexington

June 22 – 26, 2009 Federal Hospital Exercise Statewide – Lexington Governor's Emergency Management Workshop –

Louisville

August 1-4, 2009 Ky Firefighter's Association- Lexington
August 13-15, 2009 Fire Fighter Combat Challenge - Lexington

August 20 – 30, 2009 Kentucky State Fair - Louisville

September 3, 2009 Governor's Pan Flu Summit – Frankfort KEMA/KENA/APCO Conference- Louisville September 23, 2009 Madison County EOC Exercise (observe)

Continuing Education:

April 2, 2009 Web EOC Class – Versailles

April 19-24, 2009 Master Exercise Practitioner Program – Emmitsburg, MD

May 17-22, 2009 Master Exercise Practitioner Program – Emmitsburg, MD

July 13-16, 2009 ICS 300/400

August 16-21, 2009 Master Exercise Practitioner Program – Emmitsburg, MD

KyHSEEP 2009 – 2010 Future

Main KyHSEEP Exercise Proposals

October 28 – 29, 2009	CSEPP and Madison County Recovery Exercise
December 2009	Webster County Church Shooting Exercise
February 2010	Green River Fire School
March 22 – 26, 2010	Unbridled Response III Statewide FSE
May 2010	KyEM Region 1 Exercise
May 2010	Trigg County School District Exercise
TBD	Unbridled Response II Statewide
	(post-poned from last year)
TBD	World Equestrian Games Exercises
TBD	UK requested WEG TTX
TBD	CUSEC Exercises
TBD	Federal Communications Exercise
TBD	KCTCS / School & College Exercises
TBD	US Naval Reserve Exercises
